Research Scholarship in EHHD: Enacting the Land Grant Mission

Synthesis of a Research Identity for the College of Education Health and Human Development (EHHD)

The departments and programs housed within EHHD are among the most diverse grouping of disciplines housed in any college at Montana State University. Academic disciplines range from Early Childhood Education to Adult and Higher Education, and from Food Science to Mental Health Counselling. Similarly, the research agendas of our faculty are equally diverse ranging from reporting biochemical differences between organic and non-organic Fuji Apples to describing the impact of Indigenous leadership on institutional racism in schools serving American Indian communities. Although some broad themes emerge in research across EHHD, such as facilitating equity in education and health, and promoting wellness for all Montana citizens, a topical theme is difficult to establish. Nevertheless, there is common ground among such diversity and a common research identity seems to exist which is centered upon the concept of enacting the land grant mission. Specifically, a common identity is found in serving our students and communities by integrating learning, discovery and engagement.

Boyer (2016) outlined four types of scholarship (see Figure 1). The scholarship of discovery is most closely associated with the meaning that we ascribe when using the term of research. It is the process and result of empirical inquiry. Scholarship of Engagement is applied scholarship often deliberately directed toward facilitating outcomes for a specific community or within a specific context. Scholarship of Teaching and Learning is the continuous improvement of applied instructional and curricular activities to improve student outcomes. Integrated scholarship is the combination of all three, or two of the three of these other forms of scholarship (Discovery, Engagement and/or Teaching & Learning) into a single project or series of similar projects.

An example of integrated scholarship within EHHD is the Indian Leadership Education and Development (I LEAD) project. The project was initiated in 2006 through a series of professional development grants provided by the US Department of Education amounting to almost five million dollars (\$4.8M). It has increased the number of American Indian licensed school administrators in Montana 11-fold. The project began as an outreach project to provide graduate education to teachers located in the remote areas of Northeast Montana. The theory of action used to guide the project has served as a national model facilitating the preparation of Indigenous school leaders, thus providing an example of the scholarship of engagement (Henderson, Ruff, and Carjuzaa, 2015; Ruff & Erickson, 2008). The teaching methodologies used in the project questioned the appropriateness of commonly used graduate assessment methods with Indigenous students, thus providing an example and contributing to the scholarship of teaching and learning (Carjuzaa & Ruff, 2010). Finally, long-term evaluation of the project revealed a relationship that existed between the authentic leadership of project graduates and a reduction in institutional racism within the schools which these graduates lead (Henderson, Carjuzaa & Ruff, 2015). Within EHHD, such examples of integrated scholarship are numerous: Held & McCormack, "Improving chronic illness management with the Apsaalooke Nation: The Baannilah Project," Sponsored by National Institute Of Health (NIH); Miles, Walk, and Yeoman, Controlling Inflammation and Atherogenesis through Exercise and the Gut Microbiome," Sponsored by American Heart Association;

Harmon, Product Development and Evaluation Resources and Infrastructure to Support Value-Added Specialty Crops, Sponsored by Montana Department of Agriculture (MDA), (AMEHEA); Byker and Ahmed, Enhancing Dietary Quality through a Community-Based Food Intervention for FDPIR Participants on the Flathead Reservation," Sponsored by National Institute Of Health (NIH); and Carjuzaa, Ruff & Henderson, Montana Teachers of English Language Learners, sponsored by US Dept of Education, to name just a few.

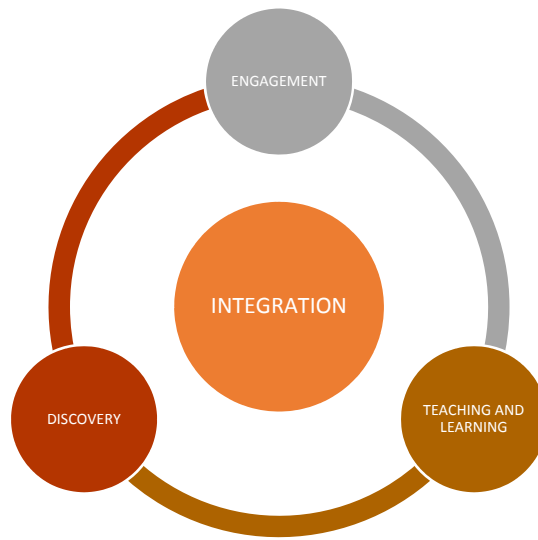

FIGURE 1
TAXONOMY OF SCHOLARSHIP WITHIN THE
COLLEGE OF EDUCATION, HEALTH AND HUMAN DEVELOPMENT

Understanding the taxonomy of scholarship that exists within EHHD is essential to appropriately recognizing, valuing and developing the full range of diverse scholarship that exists among the research agendas of all faculty members. For many of the physical, biological, and social science disciplines integrated scholarship often begins with the scholarship of discovery. Basic research is then translated into the scholarship of engagement and/or the scholarship of teaching and learning. Similarly, there are several faculty members within EHHD whose research agendas focus on the scholarship of discovery. Yet, most EHHD faculty members focus on the scholarship of engagement or the scholarship of teaching and learning then translate this scholarship into the scholarship of discovery. The creative effort for most lies in constructing a theory of action from principles derived from the physical, biological, or social sciences and applying the theory of action to a specific context, evaluating the results and adapting the theory of action (scholarship of engagement or scholarship of teaching & learning depending upon the context of the application). Such theories of action are translated into the scholarship of discovery.

Argyris (1999) wrote:

Most social science research...has as its ultimate objective explanation and generalization. It is a science after-the-fact. Social scientists observe what is going on, organize their observations into theories that explain, generalize, and predict. ...The fundamental assumption of after-the-fact theory is that someday it will become complete enough to be used to inform before-the-fact phenomena. This assumption can be questioned on empirical as well as logical grounds. (p.306)

Thus, translating outcomes from theories of action applied within specific contexts is a valid and valuable approach to generating research could be further developed. Put another way, translating the outcomes obtained through the scholarship of engagement or the scholarship of teaching and learning into the scholarship of discovery is just as important as translating the scholarship of discovery into engagement or teaching and learning.

EHHD RESEARCH CENTERS

Center for Bilingual and Multicultural Education

The Center for Bilingual and Multicultural Education has been revitalized to support the Montana State University community and tribal nations across Montana by generating multiple funding streams focusing on the following program areas: “best practices” in the revitalization and maintenance of Indigenous languages, facilitation of culturally responsive pedagogy in k-12 schools including the integration of Indian Education for All across the curriculum in all content areas and at all levels, as well as a variety of projects designed to promote social justice by increasing cultural sensitivity.

Center for Research on Rural Education

The Center for Research on Rural Education — based in the College of Education, Health and Human Development — conducts and disseminates research to support and strengthen rural education and leadership in Montana.

Science Math Resource Center (SMRC)

The Science Math Resource Center (SMRC) is devoted to the advancement of science and mathematics teaching and learning. We provide professional development for a new generation of K-12 educators of tribal, rural, and urban communities; conduct educational research; and coordinate the statewide annual Science Olympiad that is held at Montana State University in Bozeman.

Our professional development programs are delivered face-to-face and online to facilitate the formation of teachers' learning communities and to provide access to teachers in remote areas. Our programs focus on science and math content and research-based practices with a strong emphasis on the cultural context of the school community.

The SMRC is a proud partner of the [Montana Science Teachers Association](#) (MSTA), working together to promote the advancement of science education to all students in Montana through providing support to preK-12 science teachers. The faculty and university students associated with the SMRC conduct educational research for online learning and teachers' education. At the SMRC we facilitate professional experiences for graduate students interested in STEM teaching and learning in tribal and rural K-12 schools. The SMRC supports the Montana [Science Olympiad Corner](#), a year-round site dedicated to Science Olympiad coaches and students with resources, tips, and news.

EHD INTERNAL SEED GRANTS AWARDED 2016-17

TOTAL: \$128,875.00

Research Seed Grants:

NAMES	Project TITLE	Award
Jim Becker	Relationship between foot structure, mobility, and plantar load distribution	\$5,890
Kalli Decker	Parents' perspectives: A longitudinal study of Montana's Part C early intervention Services	\$5,608
Mitch Vaterlaus, Dawn Tarabochia, Mary Miles	Technology use and health behaviors among first year college students	\$4,000
Anna Elliot	Evaluating the Impact of Education Sessions on Students' Perceived Ability to Prevent Sexual Assault on Campus	\$3,134

Transformational Teaching:

NAMES	TITLE	Award
Ann Ewbank, Joyce Herbeck, Bryce Hughes, Lynn Kelting-Gibson, Bill Ruff, Godfrey Saunders	Exploring Signature Pedagogies to Strengthen the EdD	\$3,000
Colleen McMilin	Creating a Collaborative Learning Environment to Improve Student Success	\$1,535
Joyce Herbeck	Literature and Arts in Context	\$2,700

Community Based Participatory Research Seed Grants: (TWO YEAR GRANTS)

NAMES	TITLE	Award
Sweeney Windchief; others	For the People; Tribal College Leadership Development	\$19,000
Rebecca Koltz; Dawn Tarabochia	Living Well in Later Years: Focusing on Men's Well-being	\$15,741

**EHHD Office of Research
Development: Strategic Plan
2016-17**

- **Associate Dean of Research Development**
- **Project Development/ Grants Specialist**

Mentoring & Supporting

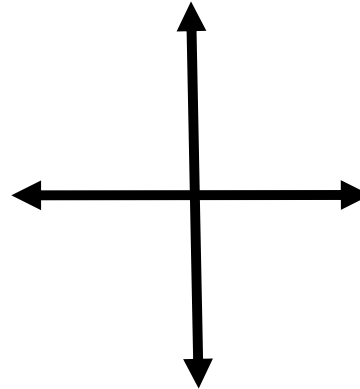

- Meet individually with new faculty re: research agenda and development
- Provide/coordinate mentoring for faculty re: research, grants, training and BOR center development
- Provide Pre-award assistance (office hours, provide training & workshops, resources, assist with writing/editing, facilitate group discussions, circulate opportunities, connect with OSP staff and forms, budget development and support, EPCF training)
- Provide Post-award assistance (post-award meetings (start-up meetings, university policies, program/planning meetings)
- Coordinate student travel scholarship program
- Coordinate college research seed grant program
- Coordinate the external grant reader/reviewer program

Planning & Reporting

- Lead policy discussions and development for policies pertaining to faculty grant activities, such as the EHHD LOI, course buy-out policies, OSP policies, IPR, etc.)
- Collect and report data regarding EHHD scholarly activities (submissions, awards, expenditures, publications, presentations etc.)
- Collect and report data re: contacts with faculty
- Meet bi-monthly with Dean to discuss initiatives and provide updates
- Attend weekly EHHD leadership team meetings, and provide progress updates monthly

Marketing & Communication

- Lead development of EHHD scholarship marketing materials
- Facilitate smooth relationships between faculty and college staff (HR and fiscal; university business office)
- Coordinate meetings with other college research coordinators /Assoc Deans
- Serve on Research Council (with VPRED)
- Serve on ADVANCE research capacity team (Suzanne Held)
- Attend OSP meetings and research facilitation network meetings
- Systematically collect and disseminate information on faculty research publications and grants in collaboration with EHHD communications (work with Office of planning and analysis and MSU library)
- Organize annual Indigenous Research Pecha Kucha with VPRED office

Research Culture

- Lead EHHD Research Committee; regularly solicit input
- Assist with recruiting excellent research faculty by meeting with candidates
- Support 'Outstanding Faculty' scholarship presentations by familiarizing with work and professionally introducing speakers
- Send congratulations to faculty successfully submitting a grant
- Develop collective research agenda for EHHD; Foster a unifying research identity
- Facilitate EHHD faculty sharing their expertise and the forming of interdisciplinary teams
- Connect EHHD to MSU research initiatives as appropriate
- Publicize university opportunities for professional development
- Identify and match professional development opportunities with faculty needs

2016-17 Accomplishments:

- Mental Health Symposium

FUTURE GOALS:

- Develop EHHD research book (virtual)
- Next Grant Boot Camp: Sustainability/management multiple grants
- Training for conducting research with Indigenous communities
- Coordination of Indigenous research (with CAIP?)

Short-term goals:

- Gift cards for grant submitters
- HR training for PIs
- Coordinate the external grant reader/reviewer program– develop a policy statement
- Use Impact Collage to market research
- Policy for scholarship with Indigenous Communities

Department, Center, or College: Education

PRODUCTIVITY REPORT: January 1, 2014 - December 31, 2016

The Department of Education is committed to MSU's land grant mission. Integrating research, teaching, and outreach is central to what we do every day. For example, we research the effectiveness of our teaching pedagogy in the classroom and then share these research findings with our colleagues in peer-reviewed journal articles, book chapters, and national and international presentations. We also bring our research to the people for whom we believe it will matter the most: college and university faculty and administrators, classroom teachers and school principals and superintendents across the state. Through our research, teaching, and outreach, we inform educational instructors and leaders from K-20 in making data-driven decisions to strengthen student learning and success. We are proud of our productivity in exemplifying MSU's mission.

During the timeframe specified, the Department of Education faculty contributed:

- *Over \$3.35 million in new grant funding
- 41 articles in peer-reviewed journals
- 3 books
- 18 book chapters in edited books or monographs
- 7 papers in conference proceedings
- 7 technical reports
- 331 scientific/scholarly presentations

*New grant funding is not consistently reported. In some instances, the grant listed notes only the funds for the first year of a multi-year grant, under-reporting the total amount of grant dollars awarded.

There are 27 full-time Department of Education faculty listed during the period of January 1, 2014 – December 31, 2016. It is important to note Robert Carson and Jayne Downey served nearly exclusively in administrative roles during this time frame. Sarah Pennington joined the Department of Education faculty in August 2016. Finally, the Department has two full-time Assistant Clinical Teaching Professors and two full-time instructors with limited to no research expectations. It is important to consider the Department's research productivity in light of the faculty composition.

I. REPORT INCLUDES: Full-time Tenured/Tenure-Track and Non-Tenure-Track Faculty

Department, Center, or College: Health & Human Development

PRODUCTIVITY REPORT: January 1, 2014 - December 31, 2016

Major Accomplishments

In the Department of HHD, one major accomplishment has 2014-2016 has been to recruit new faculty who are research-oriented. The new faculty have been very productive in grant-writing, grant management, and in writing research publications. This has created a new, heightened research culture for the Department, with young researchers providing new energy to the Department.

A second major accomplishment was to have an associate dean for research position established and maintained to help provide guidance and training in grant writing and management to both assistant professors and associate professors in the Department. As a result, an unprecedented number of grants were written and a high percentage were funded in the time period. An additional help to the grant writing and management has been the continued partial funding of a grant profession, Dr. Elizabeth Bird, who has helped the grant writers immensely with their applications. The Office of Sponsored Programs is also a big help in getting the grants submitted correctly and on time, and then helping researchers manage the budgets after the grants are funded.

The final major accomplishment has been in faculty commitment to writing research results, aided by participation in writing groups that the Center for Faculty Excellence has fostered. These writing groups help make the research writing more urgent, which has aided the increase in the number of papers submitted and accepted for publication.

Goals for 2017-2018

1. Continue to do quality work to perform the duties required in existing grants within budget.
2. Encourage faculty to spend time writing results from previous data collection activities, so the data is published in double-blind, peer-reviewed journals in their respective fields.
 - a. Work with faculty to foster the practice of being in writing groups sponsored by the Center for Faculty Excellence.
 - b. Work with new faculty to get them integrated with writing groups.
3. Establish a Friday research presentation meeting of faculty in the department to create a heightened sense of a research culture in the Department.
4. Offer new faculty the opportunity to participate in Research Boot Camps, as they are offered in the College and in the University.
5. Work to find new research space, especially for the food, nutrition, food science, and biomechanics faculty.
6. Maintain and enhance graduate students research space in the Department in Romney, Herrick, and Reid Halls.
7. Continue to fund travel to allow faculty to present their research at conferences.
8. Continue to cooperate with in-state groups, especially tribal communities, to understand needs that can form the bases for new research initiatives.
9. As far as possible within budgetary constraints, help fund research equipment and software to further the operationalization of research projects for faculty.
10. Highlight research efforts through Departmental and College publications, displays of research posters in public spaces, and in news releases.
11. Spotlight research efforts in the Department that illustrate the integration of discovery, learning, and outreach through news releases, presentations to various advisory boards active in the Department and College, and presentations at local, regional, national, and international conferences.

II. RESEARCH AND SCHOLARLY/CREATIVE ACTIVITY

A. Departmental Evaluation of Research and Creative Activities

Specific accomplishments:

The faculty in the Department of Health and Human Development has increased productivity in research due to expanded training in grant writing and intense faculty work on publishing research. Productivity included:

- 70 peer-reviewed journal articles over the 2014-2016 time period were published, eight book chapters/monographs, three reviewed Extension publications, seven technology transfer pieces, 49 media contributions, and nine other reviewed and non-reviewed materials were published.
- 9 conference abstracts, both reviewed and non-reviewed were published.
- 1 technical report was published.
- 8 articles appeared in the popular press.
- Over 315 scientific presentations were given.

- 54 new grants were secured.
- 2 grants were continuing grants.
- 73 proposals were submitted.
