

# History

## Master of Science in Science Education Program

In May of 1996, the Montana Board of Regents of Higher Education approved a new degree, the Master of Science in Science Education (MSSE), designed for science educators interested in graduate study while remaining employed. MSSE is unusual in two important ways. First, it is an intercollege, interdisciplinary effort. Five colleges, The Graduate School, and sixteen departments collaborate to offer this innovative degree. Second, up to ninety percent of the course credits needed to complete the degree are offered by distance learning in structured interactive courses using asynchronous, computer mediated instruction. While direct oversight of the program was provided by the Graduate School from inception to 2016, the program was moved to the College of Letters and Science July 1, 2016. In addition to completing core courses in education, those seeking the degree develop interdisciplinary combinations of science courses from offerings in biology, chemistry, Earth science, ecology, engineering, microbiology, physics, plant science, and other science content areas. All graduates complete a capstone project before graduation.

**Norm Reed**, Coordinator 1996 - 1998, artfully handled admissions for the first two cohorts, oversaw design and development of core classes, and overall implementation of the program.

**Carol Thoresen**, Coordinator 1999 - 2007, grew the program from 25 to about 60 students per year. Larger enrollment allowed for a wider variety of science course offerings. Carol worked with instructors and researchers to develop over 25 new program courses.

**Peggy Taylor**, Director 2007 - 2016, was a graduate of the program's first cohort and brought a unique perspective to its administration. Contributions included expansion of the program's targeted populations, strengthening the program's framework through continuous evaluation processes, and increasing course offerings as well as involvement of science MSU faculty.

**Gregory Francis**, Director 2016 - 2020, is a tenured professor in the Physics Department. When the MSSE Program first began in 1996, Greg was one of the original core science faculty in the physics content area.

**Diana Paterson**, Associate Director 2002 - 2019. She provided critical recruiting and advising support to off-campus graduate students. Diana skillfully managed the MSSE office and staff. She retired in 2019.

**Jessi Anderson**, the current Faculty Lead Instructor, is also a Core Instructor and the formatting expert for Capstone Papers. Jessi is an MSSE Graduate and has extensive experience working with teachers and online instruction.

**Holly Thompson Reed**, Academic Advisor, joined the program in 2012. Her responsibilities include academic advising, admissions, and general student support.

**Pilar Martland**, Program Coordinator, joined the program in 2024. Her responsibilities include general administrative support and coordination of the MSSE Summer Capstone Symposium.

**John Graves**, the current Director (2021-present), has been a core MSSE instructor since 2003. He served as Lead Program Faculty from 2009-2020.

## MSSE Capstone Project

Each Master of Science in Science Education (MSSE) student, with the cooperation of their graduate committee, identifies and completes a capstone project. Each project is designed to provide experience and information that aids our understanding of science teaching-learning or science curriculum. The capstone project topic is generally identified early in the student's graduate program. A student begins the project, which generally relates to science education in the MSSE student's educational setting, in the fall of the final year by submitting a proposal to their advisor. The results of each student's project are summarized in a written professional paper completed and presented in the student's final summer session. The MSSE Steering Committee, faculty, and staff congratulate these deserving graduate students for their persistence to pursue a graduate degree, while continuing full-time employment as science educators.

## MSSE Program, College of Letters and Science

Director  
Faculty Lead Instructor  
Academic Advisor  
Program Coordinator

John Graves  
Jessi Anderson  
Holly Thompson Reed  
Pilar Martland

## Supporting Colleges & Divisions

Academic Technology & Outreach  
College of Agriculture  
College of Engineering  
College of Education, Health & Human Development  
College of Letters & Science  
The Graduate School

Kim Obbink

Michael Giroux

## MSSE Faculty Steering Committee

Nick Lux  
Todd Kaiser  
Michelle Miley  
Ken Taylor  
Angie Weikert

Chair, Department of Education  
Electrical Engineering  
College of Letters & Science  
MSSE  
Crosscut Mountain Sports Center

## 2025 Capstone Project Advisors & Committee Members

Lindsey Albertson, Ecology  
Jessi Anderson, MSSE Program  
Callan Bentley, MSSE Program  
Joe Bradshaw, Gallatin College/MSSE  
Sanlyn Buxner, MSSE Program  
Nick Childs, Physics  
Shawn Dash, Hampton University  
John Graves, MSSE Program  
Robyn Gotz, Earth & Weather Science  
Joe Gubanyi, Concordia University  
Robyn Klein, Plant Sciences & Plant Pathology  
Dan Lawver, Touro College of Osteopathic Medicine  
Nick Lux, Department of Education  
Amanda Mattson, Chemistry  
Chris Pavlovich, MSSE Program  
Zoe Pratte, Microbiology & Cell Biology  
Marcie Reuer, Department of Education  
Patrice Rex, MSSE Program  
Dana Skorupa, Chemical & Biological Engineering  
Suzanna Soileau, Land Resources & Environmental Sciences  
Ben Spicer, Sewickley Academy  
Aki Takeda, Physics  
Ken Taylor, Physics  
Amy Washtak, MSSE Program  
Seth White, Oregon State University  
Dave Willey, Ecology  
Walt Woolbaugh, MSSE Program

## Capstone Presentation Schedule

Presenter	Facilitator	Advisor	Date	Time
Marcela Ines Blanco	Celeste Kenworthy	Woolbaugh/Rex/Dash	June 30	12:00 pm
Rachel Julia Brown	Kyle Roberts	Graves/Mattson	June 30	3:30 pm
Collin Buck	Natalie Paula Taranec	Anderson/Albertson	June 30	10:00 am
Elysia Burroughs	N/A	Anderson/Bradshaw	ZOOM/July 8	10:00 am
Andrea Clark	Rachel Martin	Woolbaugh/Klein	July 2	8:00 am
Lauren Coffey	Tyler Hunt	Anderson/Willey	July 1	12:30 pm
Jeffrey Cohen	Iain Ridgway	Graves/Skorupa	July 1	1:00 pm
Kevin Conroy	Rachel Julia Brown	Woolbaugh/K. Taylor	July 1	12:00 pm
Jackson Riley Dinsmore	Andrea Clark	Woolbaugh/Pratte	July 1	1:30 pm
Mitchell Ehrman	Kevin Conroy	Pavlovich/Gotz	July 2	11:00 am
Rhiannon Fleming	Chad Martin	Graves/Takeda	July 2	10:00 am
Sandra Gibson	Rachael Gradwell	Anderson/Lawver	July 2	10:30 am
Rachael Gradwell	Rhiannon Fleming	Woolbaugh/Willey	July 1	8:00 am
Raymond Guest	Kelsey Ravanis	Pavlovich/Washtak	July 1	9:00 am
Matt Hopkins	Aaron Stephen Petrie	Graves/Pratte	July 1	11:00 am
Tyler Hunt	Raymond Guest	Graves/Reuer	June 30	2:00 pm
Nicole Katzaroff	Sandra Gibson	Woolbaugh/Rex/Reuer	July 1	10:30 am
Celeste Kenworthy	Stephanie Kerr	Graves/Gotz	July 1	2:30 pm
Stephanie Kerr	Eric Eugene Ryburn	Pavlovich/Bradshaw	June 30	2:30 pm
Anna Le	Collin Buck	Graves/Willey/White	July 2	11:30 am
Weston Manor	Mitch Tucker	Pavlovich/Gotz	July 1	11:30 am

Presenter	Facilitator	Advisor	Date	Time
Chad Martin	Marcela Ines Blanco	Graves/Lawver	June 30	9:30 am
Rachel Martin	Austin O'Hare	Anderson/Skorupa	July 1	8:30 am
Braden Marum	Stephanie K. Milam-Edwards	Woolbaugh/Childs	June 30	1:30 pm
Stephanie K. Milam-Edwards	Marli Ockander	Graves/Soileau	July 1	9:30 am
Marli Ockander	Jeffrey Cohen	Woolbaugh/Rex/Gubanyi	June 30	3:00 pm
Bradley O'Connell	Braden Marum	Anderson/Gotz	July 1	10:00 am
Austin O'hare	Mitchell Ehrman	Woolbaugh/Lux	June 30	10:30 am
Heather Shannon Pagano	N/A	Graves/Bradshaw	ZOOM/July 8	10:00 am
Samantha Perry	N/A	Anderson/Lawver	ZOOM/July 8	10:00 am
Aaron Stephen Petrie	Matt Hopkins	Pavlovich/Mattson	June 30	1:00 pm
Kelsey Ravanis	Jackson Riley Dinsmore	Graves/Gotz	June 30	12:30 pm
Iain Ridgway	Nicole Katzaroff	Pavlovich/Bentley	July 2	9:00 am
Kyle Roberts	Anna Le	Anderson/Lawver	July 2	8:30 am
Eric Eugene Ryburn	Michelle Zarowny	Anderson/K. Taylor	July 1	2:00 pm
Natalie Paula Taranec	Bradley O'Connell	Woolbaugh/Klein	July 2	9:30 am
Mitch Tucker	Weston Manor	Woolbaugh/Spicer	June 30	9:00 am
Michelle Zarowny	Lauren Coffey	Graves/Buxner	June 30	11:00 am

## Summer 2025 MSSE Science Education Symposium Presentations

### **Monday, June 30th**

9 am      **Mitch Tucker** – Mount Prospect, IL  
Palatine High School, Palatine, IL  
Romney 415

Woolbaugh/Spicer  
Facilitator: Weston Manor

#### ***The Impact of AP Classroom Assignments on Students in AP Physics C***

Students were given assignments from the AP Classroom website in lieu of standard homework. Student engagement, interest, confidence, and achievement were measured using surveys, interviews, assessment results, and teacher observations. A mix of qualitative and quantitative data analysis strategies were used. The results suggested that while students felt more confident after completing the AP Classroom assignments, there was no significant impact on levels of engagement, interest, or achievement.

9:30 am   **Chad Martin** – Oak Harbor, WA  
Olympic View Elementary School, Oak Harbor, WA  
Romney 413

Graves/Lawver  
Facilitator: Marcela Ines Blanco

#### ***The Effectiveness of Using Claim, Evidence, and Reasoning to Improve Analytical Writing in Elementary Literacy***

This study explored the effectiveness of using Claim, Evidence, and Reasoning as a writing framework to help fourth-grade ELA students apply analytical reasoning to their written responses. The research took place over an eight-week period and utilized data collection instruments that included pre- and post-intervention writing assessments, writing confidence surveys, teacher observations, and student interviews. The results of the study indicated a moderate gain in student performance.

10 am      **Collin Buck** – Kalispell, MT  
Idaho Home Learning Academy, Malad, ID  
Romney 415

Anderson/Albertson  
Facilitator: Natalie Paula Taranec

#### ***The Impact of Online Discussion Boards on Students' Abilities to Use Science and Engineering Practices in Case Studies***

In my study, students were asked to complete four "performance tasks", online case studies that are intended to assess students' abilities to use science and engineering practices. Two of these case studies were assigned with discussion boards, and two were assigned without discussion boards for the experimental group. The control group had no discussion boards for any of the performance tasks. The experimental group showed a larger improvement over the four performance tasks than the control group.

10:30 am   **Austin O'Hare** – Grand Forks, ND  
Crookston Secondary, Crookston, MN  
Romney 413

Woolbaugh/Lux  
Facilitator: Mitchell Ehrman

#### ***The Impact of Retrieval Practice on High School Biology Assessment Performance***

This study examined how retrieval quizzes affect summative assessments in a high school biology class. The study took place over three units with a different treatment applied to each unit. Unit one had no quizzes, unit two had required quizzes, and unit three had optional quizzes. Data from assessments, student surveys, quiz completion, and teacher notes showed that, when quizzes were required, students completed more quizzes and performed better on their summative assessments.

11 am      **Michelle Zarowny** – Grande Prairie, Alberta, Canada  
Romney 415

Graves/Buxner  
Facilitator: Lauren Coffey

#### ***Land-Based Learning in Junior High Science***

Lesson plans based on the pedagogy of land-based learning were implemented within a junior high space exploration unit. Land-based learning connects people to the land using Indigenous knowledge and cultural practices. Designed to follow the Alberta Science 9 Program of Studies, these lessons can be used throughout the unit of study to foster environmental stewardship and embed Indigenous knowledge in an authentic way.

12 pm **Marcela Ines Blanco**— El Paso, TX  
Riverside Middle School, El Paso, TX  
Romney 415

Woolbaugh/Rex/Dash  
Facilitator: Celeste Kenworthy

***The Impact of Science Project-Based Learning as an Intervention Strategy on Middle School Students***

Middle school students engaged in a science PBL intervention class. Students were challenged to complete science-based mini-projects or to generate solutions and explanations to a given “problem”. Data collection included pre and post surveys, notebook entries, sentence summaries, and student presentations. Quantitative and qualitative data was collected to measure the impact of treatment and to ensure validity of the study. Results suggest students expressed a positive or neutral experience with PBL, as well as a deeper connection to science concepts.

12:30 pm **Kelsey Ravanis** – Burlington, MA  
Marshall Simonds Middle School, Burlington, MA  
Romney 413

Graves/Gotz  
Facilitator: Jackson Riley Dinsmore

***The Impact of Nature Journaling on Student Well-Being and Stress Levels***

This project explored the impact of nature journaling on middle school students’ mental health. Through the course of several weeks, students engaged in weekly nature journal sessions that were aimed to foster student connection to nature and were used as a mindfulness technique. Surveys and analysis determined connections between spending time focused on nature and student well-being. The results indicate that nature journaling can be used as a beneficial mindfulness technique for middle school students. The study had a positive impact on students’ feelings towards nature and students learned the value of appreciating nature for what it has to offer.

1:00 pm **Aaron Stephen Petrie** – Gallipolis, OH  
Gallia Academy High School, Gallipolis, OH  
Romney 415

Pavlovich/Mattson  
Facilitator: Matt Hopkins

***Implementing Mental Health and Wellness-Focused Interventions in a Chemistry Classroom***

High school students were introduced to strategies designed to support their mental health and wellness. These strategies were systematically introduced in a "topic of the day" format. The topics explored were mindfulness, nutrition, sleep, and exercise. Pre- and post-treatment surveys, a teacher reflection notebook, and student reflection notebooks were used as data collection instruments. Data were analyzed through both quantitative and qualitative methods. The results indicated that students gained knowledge of interventions, and their attitudes toward using them improved.

1:30 pm **Braden Marum** – Billings, MT  
Lockwood High School, Lockwood, MT  
Romney 413

Woolbaugh/Childs  
Facilitator: Stephanie K. Milam-Edwards

***How will the Implementation of a Weekly Formative Assessment, Where Students will be Required to Analyze a Graph, Impact Student Data Literacy?***

Students practiced data literacy by engaging in a weekly formative assessment that required them to analyze a graph which presents data non-specific to the class, like what could be found in a news report or social media graphic. Pre- and post-treatment surveys, pre- and post-treatment summative assessments, and weekly formative assessment results were used as data collection instruments. Results from the treatment show that there was no significant improvement in students’ data literacy skills despite students reporting that they felt more confident in their ability to analyze data.

2:00 pm **Tyler Hunt** – Sandyston, NJ  
Sussex County Technical School, Sparta, NJ  
Romney 415

Graves/Reuer  
Facilitator: Raymond Guest

***Use of Real-World Examples in Chemistry Instruction to Reinforce Chemistry Core Concepts***

Students were provided instruction where examples of the real-world applications of chemistry were implemented. The data collection instruments of this classroom-based research project included student surveys, an observation record which included student interviews, and student artifacts. When comparing the data between the treatment and non-treatment groups, the evidence suggested that the use of real-world applications in chemistry increased the students’ performance and positive perception of the subject.

2:30 pm **Stephanie Kerr** – Wolfeboro, NH  
Kingswood Regional Middle School, Wolfeboro, NH  
Romney 413

Pavlovich/Bradshaw  
Facilitator: Eric Eugene Ryburn

***The Effects of Nature Journaling on Middle School Science Engagement***

This study examined how nature journaling could enhance engagement in middle school science. Over six weeks, seventh-grade students participated in weekly indoor and outdoor journaling sessions focused on observation, noticing details, and asking questions. Data from surveys, open-ended responses, journal analysis, and observation checklists were processed using both quantitative and qualitative analysis strategies. Results showed increased curiosity, improved observational skills, and stronger connections to scientific concepts suggesting nature journaling can be a valuable tool for promoting STEM engagement and literacy.

3 pm **Marli Ockander** – Sioux Falls, SD  
Sioux Falls Lutheran School, SD  
Romney 415

Woolbaugh/Rex/Gubanyi  
Facilitator: Jeffrey Cohen

***Student Comprehension of Informational Text in Middle School Science***

Students were explicitly taught three strategies to enhance their understanding of informational text. Students completed a computer-adaptive achievement test before and after treatment. Additionally, pre-and post-treatment surveys and interviews were conducted to explore connections between the students' perceptions and their reading comprehension. Results indicated no significant improvements after the explicit instruction. However, continued vocabulary instruction in science appears to be beneficial.

3:30 pm **Rachel Julia Brown** – Belgrade, MT  
Willow Creek School, Willow Creek, MT  
Romney 413

Graves/Mattson  
Facilitator: Kyle Roberts

***Engage Before Explain: Investigating the Impact of 5E Sequencing on Student Achievement and Engagement in Science***

This study examined how sequencing the Engage and Explore phases before Explain in the 5E model affected student engagement and achievement in an 8th-grade physical science class at a small, rural school. Over eight weeks, data was collected using pre- and post-surveys, unit test scores, and teacher observations. Due to a small sample size and unit topic bias, the results for this project were fairly inconclusive, but indicated trends favoring traditional instruction in achievement, and inquiry-based instruction in engagement.

**Tuesday, July 1st**

8 am **Rachael Gradwell** – Manchester, PA  
Dover Area Middle School, Dover, PA  
Romney 415

Woolbaugh/Willey  
Facilitator: Rhiannon Fleming

***The Impact of Increasing Middle School Science Class Size on Student Achievement and Teacher Burnout***

This study explored how a 57% increase in middle school class size influenced student performance in multiple ways and affected teacher burnout. The base treatment was a sudden increase in students per class and had four phases including both solo teaching and co-teaching. Throughout those phases data was collected through gradebook analysis, surveys, interviews, journaling, and burnout scales. Results revealed differential impacts on academic achievement, declines in work completion, and rising teacher stress.

8:30 am **Rachel Martin** – Zelienople, PA  
Slippery Rock Area High School, Slippery Rock, PA  
Romney 413

Anderson/Skorupa  
Facilitator: Austin O'Hare

***Evaluating the Impact of Incorporating Primary Scientific Literature into the AP Biology Classroom***

Students engaged with primary scientific literature through annotations, concept mapping, and designing follow-up experiments. Data was collected using pre- and post-tests, Likert scale surveys, and interviews. Results showed increased student confidence in reading and analyzing scientific texts. Students also improved on free-response questions requiring interpretation of research, suggesting that primary literature supports science literacy and critical thinking in high school classrooms.

9 am **Raymond Guest** – Missoula, MT  
University of Montana, Missoula, MT  
Romney 415

Pavlovich/Washtak  
Facilitator: Kelsey Ravanis

***Engaging Students Outside the Science Classroom with the 5E Learning Cycle***

The 5E Learning Cycle was utilized in a first-year College Success seminar to increase active learning. The study examined student engagement, comprehension, and attitude, using a mix of surveys, quizzes, observations, and interviews. The research found that students in the 5E section showed greater enthusiasm and preferred inquiry-driven activities compared to the lecture-based sections. The results indicate that inquiry-based learning can be an effective strategy for promoting student success in college classrooms and across disciplines.

9:30 am **Stephanie K. Milam-Edwards** – Mesa, AZ  
Tempe High School, Tempe, AZ  
Romney 413

Graves/Soileau  
Facilitator: Marli Ockander

***Integrating Educational Comics in High School Science***

When at-level reading comprehension skills are deficient, through low retention or barriers to language acquisition, it creates a roadblock to understanding scientific concepts at proficient levels. By pairing at-level scientific reading with constant visual cues, like those found in comic and graphic novels, two modalities for learning are utilized to achieve scientific literacy simultaneously in a format that students already recognize. This project provides teachers with a guide to integrate educational comics as part of 3D lessons from curriculum resources they already have to enhance student learning that ultimately will increase scientific literacy.

10 am **Bradley O'Connell** – Clinton, IA  
Clinton High School, Clinton, IA  
Romney 415

Anderson/Gotz  
Facilitator: Braden Marum

***Engagement through Case Studies in the Earth Science Classroom***

Students explored and analyzed content-specific case studies to connect real-world challenges with Earth Science concepts, aiming to increase engagement. The research was structured around three cycles, each incorporating four distinct learning activities. Data on engagement, motivation, and student perspectives were collected through surveys, interviews, observations, and exit tickets. Both thematic and statistical methods were used to analyze the data. The results indicated that incorporating case studies into the curriculum increased students' motivation and engagement with Earth Science content.

10:30 am **Nicole Katzaroff** – Costa Mesa, CA  
Foothill High School, Tustin, CA  
Romney 413

Woolbaugh/Rex/Reuer  
Facilitator: Sandra Gibson

***The Effectiveness of Quiz Retakes in an Honors Chemistry Classroom***

This action research project examined the impact of quiz retakes in an honors chemistry classroom. Students were not allowed retakes for two units, then permitted retakes for two units. Data on student anxiety, work habits, learning mastery, and teacher workload were collected throughout the study. Results indicate that quiz retakes did not reduce anxiety, affect student work habits, improve learning mastery, or positively impact teacher workload and well-being. Overall, the findings suggest that quiz retakes had limited benefits in this classroom context.

11 am **Matt Hopkins** – Palatine, IL  
William Fremd High School, Palatine, IL  
Romney 415

Graves/Pratte  
Facilitator: Aaron Stephen Petrie

***Seating Arrangement and Student Collaboration in a High School Chemistry Classroom***

This study examined how seating arrangement impacted student collaboration in a high school chemistry classroom. Students experienced row-and-column, pods, and table layouts. Data from surveys, classroom observations, and interviews were analyzed using qualitative and quantitative methods. Pods resulted in significantly more on-task interactions and higher student perceptions of collaboration and participation. Rows limited engagement, while tables offered moderate structure. Results suggest seating design influences collaborative behavior and can be used strategically to support student engagement in science learning.

11:30 am **Weston Manor** – Carlsbad, CA  
Rancho La Costa Habitat Preserve, Carlsbad, CA  
Romney 413

Pavlovich/Gotz  
Facilitator: Mitch Tucker

***Measuring and Evaluating Atmospheric Properties as a Guide to Building a Project-Based Learning Experience in an Earth Science Classroom***

This educational scholarship paper is a project-based learning unit for educators to use to teach atmospheric science concepts. The lesson sequence includes hands-on activities for students to explain an atmospheric phenomenon as well as a place-based field research example to apply their prior knowledge from the classroom activities. The place-based field research example collected atmospheric data to use as evidence to explain the presence or absence of a temperature inversion over the area.

12 pm      **Kevin Conroy** – Watertown, CT  
The Taft School, Watertown, CT  
Romney 415

Woolbaugh/Taylor  
Facilitator: Rachel Julia Brown

***Enhancing Written Argumentation in Ninth Grade Physics Utilizing the Science Writing Heuristic***

Students were taught using the Science Writing Heuristic (SWH), a learning approach that scaffolds inquiry-based investigations through writing and argumentation. Investigations included analyzing the motion of a buggy car and studying quantities that affect acceleration. Likert surveys, interviews, an argumentation rubric, student-work examples, and a teacher journal were used to collect both qualitative and quantitative data. The results suggested that students made gains in their ability to write evidence-based arguments; student confidence in performing investigations also saw noticeable increases.

12:30 pm   **Lauren Coffey** – Salt Lake City, UT  
Whittier Elementary School, Salt Lake City, UT  
Romney 413

Anderson/Willey  
Facilitator: Tyler Hunt

***Investigating the Impact of Inquiry-Based Learning on Students' Questioning Skills in Title 1 Science Classrooms***

In a 5th-grade classroom, students explored properties and changes of matter through inquiry-based learning tasks. After each investigation, they generated questions to guide future inquiries. Data from content tests, surveys, interviews, and observations were analyzed using qualitative and quantitative methods. Findings showed increased engagement and improvements in the quality of student-generated questions on post-assessments.

1 pm        **Jeffrey Cohen** – South Orange, NJ  
The Pingry Lower School, Short Hills, NJ  
Romney 415

Graves/Skorupa  
Facilitator: Iain Ridgway

***Creating Respectful Discourse in an Elementary Science Classroom***

This study examined peer teasing and the quality of student discourse in a 5th-grade science classroom. The Science Writing Heuristic (SWH) and various sociocultural techniques were utilized to encourage respectful discourse and argumentation in science. Pre- and post-treatment surveys, interviews, and classroom observations were used to collect data. The data were analyzed using a mixed-methods approach. Results indicated a modest improvement in discourse quality, leading to more respectful and meaningful interactions and a slight decrease in teasing.

1:30 pm    **Jackson Riley Dinsmore** – Kansas City, MO  
Blue Valley North High School, Overland Park, KS  
Romney 413

Woolbaugh/Pratte  
Facilitator: Andrea Clark

***Exploring the Role of Portfolios in Fostering Metacognition in High School Science***

This study investigated how implementing student portfolios in a high school biology class impacted the development of reflective practices and higher-order thinking (HOT) skills. The treatment involved students completing portfolios that included embedded reflections and tasks aligned with HOT skills such as analysis, synthesis, and application. Quantitative and qualitative data sources—including rubrics, surveys, and focus group interviews—revealed increased metacognitive awareness, modest growth in students' HOT performance, and positive shifts in organization and attitudes toward learning.

2 pm        **Eric Eugene Ryburn** – Richmond, TX  
George Ranch High School, Richmond, TX  
Romney 415

Anderson/K. Taylor  
Facilitator: Michelle Zarowny

***The Effects of Using Claim-Evidence-Reasoning Scaffolding to Assist AP Physics 1 Students in Writing Free-Response Questions***

The project was implemented to study the efficacy of the claim-evidence-reasoning (CER) scaffold on the quality of written responses and students' experiences with the scaffold. Responses to two free-response questions, one using CER and the other using any method chosen by each responder, along with a survey about experience with CER, were collected and analyzed. The results showed an overall improvement in response quality and an overall positive experience with CER.

2:30 pm    **Celeste Kenworthy** – Phoenix, AZ  
Arizona Center for Nature Conservation (Phoenix Zoo), Phoenix, AZ  
Romney 413

Graves/Gotz  
Facilitator: Stephanie Kerr

***Nature-Connectedness, Knowledge, and Attitudes of Camp Zoo Attendees***

Campers attended a one-week camp during the fall or winter at the Phoenix Zoo, participating in activities like animal interactions, animal discoveries, and unstructured nature play. Data collection instruments were a Likert-type survey, pre- and post-tests, and a personal meaning map. Data was analyzed both quantitatively and qualitatively. The results indicated that campers maintained a relatively high level of nature-connectedness and associated Camp Zoo with friends, fun, and animals.

## **Wednesday, July 2nd**

8 am **Andrea Clark** – Bonifacio Global City, Taguig, Metro Manila, Philippines  
International School of Manila in BGC, Philippines  
Romney 415

Woolbaugh/Klein  
Facilitator: Rachel Martin

### ***Note-taking Strategies for Middle School Science***

This study explores how student choice in note-taking influences academic performance and engagement. Teacher-created note-booklets ensured that the work-load difference between digital and physical formats was negligible while also increasing engagement by offering clear organization and a manageable scope of study. Using surveys, interviews, and assessments, the researcher found no meaningful difference in engagement or academic success between the note-taking methods. Students select digital notes because they support readability and ease of use, whereas physical notes are chosen for personalization and memory recall. The research demonstrates how student learning experiences improve through student choice and structured support.

8:30 am **Kyle Roberts** – Great Falls, MT  
Loy Elementary School, Great Falls, MT  
Romney 413

Anderson/Lawver  
Facilitator: Anna Le

### ***The Impact of Small Group Collaboration on Classroom Engagement in 4th-Grade Science Lessons***

Students in a fourth-grade class were given a structured framework to follow during small group discussions and collaborative work. The effect on student engagement was measured using surveys, teacher observations, behavior tallies, and interviews. Data were analyzed through statistical and thematic methods. Results suggested that the discussion framework promoted greater engagement and more meaningful participation in classroom conversations.

9 am **Iain Ridgway** – Worcester, MA  
Bancroft School, Worcester, MA  
Romney 415

Pavlovich/Bentley  
Facilitator: Nicole Katzaroff

### ***Impact of Gradeless Formative Assessments in High School Science Classes***

The impact of graded versus gradeless (treatment) formative assessments on student growth and performance in two science classes was investigated. Data collection included pre-, during and post-surveys, interviews and summative assessment scores. Results demonstrated that students in the graded group performed significantly better in one unit, while no significant difference was observed in the second. Student surveys suggested graded formative assessments provided clearer feedback and increased motivation to learn. Findings suggest grading formative assessments enhances student engagement and comprehension.

9:30 am **Natalie Paula Taranec** – Almaty, Kazakhstan  
Almaty International School, Almaty, Kazakhstan  
Romney 413

Woolbaugh/Klein  
Facilitator: Bradley O'Connell

### ***The Effect of Targeted Secondary Research Strategies in Middle School Science***

This study evaluated whether targeted research strategies positively impacted students' written understandings of scientific concepts. During three learning cycles in two Grade 8 Earth Science classrooms, students were given mini-research lessons and research scaffolds to support their understanding of searching, analyzing, and organizing information. A student-perception Likert Survey, research work samples, narrative unit reflections, in-depth interviews, and teacher journal notes were used to collect quantitative and qualitative data. Despite little difference between the treatment and comparison group, most students produced detailed conclusions, showed increased engagement, and had good recall of information about their secondary research projects.

10 am **Rhiannon Fleming** – Bozeman, MT  
Montana State University, Bozeman, MT  
Romney 415

Graves/Takeda  
Facilitator: Chad Martin

### ***Understanding the impacts of the Montana State University Solar Physics/Astrophysics Research Experience for Undergraduates***

Research Experience for Undergraduates (REU) enhances subject knowledge, research skills, and scientific networking. Montana State University's solar/astrophysics REU has run for 23 years, encouraging student growth. In 2024, we tracked progress with formative assessments, surveys, interviews, and observation journals. Quantitative analysis applied averages, normalized gains, and Chi-Squared tests, while qualitative data revealed key themes. Results showed increased confidence in material and presentation skills. The researcher recommended enhancing community engagement and continuing outreach efforts to improve satisfaction.

10:30 am **Sandra Gibson** – Boynton Beach, FL  
Park Vista Community High School, Lake Worth, FL

Anderson/Lawver  
Facilitator: Rachael Gradwell

***The Impact of Self-Assessments on Academic Performance of High School Biology Students***

Students used self-assessment on standards-based tests to identify areas for remediation or enrichment. They addressed learning gaps using manipulatives and interactive videos. Pretests, posttests, Likert scales, and student surveys provided feedback. Paired t-tests and thematic analysis showed that the self-assessment strategy led to improved academic performance and greater student ownership of learning.

11 am **Mitchell J. Ehrman** – Cincinnati, OH  
D. Russel Lee High School, Hamilton, OH  
Romney 415

Pavlovich/Gotz  
Facilitator: Kevin Conroy

***Utilizing Problem Based Learning in a College Credit Plus Physics Classroom***

A Problem Based Learning (PBL) approach was the method of instruction during this study. Effects on student assessment performance, classroom engagement, and assignment autonomy were measured. Data collection instruments included comparison of mean unit exam scores, surveys of student perception, and observations of student autonomy. While exam scores initially decreased, they surpassed those of the control group. Many students responded favorably to PBL activities indicating an increase in classroom engagement, and many others provided suggestions to make PBL more meaningful to them. Teacher intervention during lab activities decreased as the study progressed.

11:30 am **Anna Le** – Portland, OR  
Grayling Education, Portland, OR  
Romney 413

Graves/Willey/White  
Facilitator: Collin Buck

***Exploring the Impacts of Personal Meaning Maps on Students' Learning in Outdoor Science Education***

This study examined the effects of personal meaning maps as an assessment tool in improving engagement and comfort in a place-based outdoor science learning environment. Data collection instruments included a pre-activity survey, pre- and post-personal meaning map assessment, and interviews. Quantitative and qualitative analysis methods were used to understand how the students' backgrounds influenced their learning. The results indicated that implementing personal meaning maps as an assessment tool contributed to a positive shift in learning and connecting with the subject.

## ***Presentations Outside of Capstone Symposium Week***

**Heather Shannon Pagano** – Wayne, NJ  
George Washington Middle School, Wayne, NJ  
ZOOM

Graves/Bradshaw  
Facilitator: N/A

### ***Location, Location, Location! Resources for Place-Based Education in The Middle School Science Classroom***

Through application of science and engineering practices and crosscutting concepts to address middle school life and earth science standards, lessons were developed based on research encompassing early adolescent development and best practices in an inquiry-based classroom. Tenants of place-based education and examples of formal and informal learning environments were also incorporated. Lessons followed the 5E model of science teaching.

**Samantha Perry** – Ceres, NY  
Port Allegany School District, Port Allegany, PA

Anderson/Lawver  
Facilitator: N/A

### ***The Effects of Game-Based Learning Methods in Middle School Science***

This study investigated the impact of hands-on and digital game-based learning on engagement and knowledge retention in an 8th-grade general science class. Interactive digital and hands-on science games were implemented during instruction. Results showed increased engagement across both methods, with hands-on activities encouraging collaboration and digital games supporting content retention. A blended game-based learning approach may enhance motivation and improve science learning outcomes.

**Elysia Burroughs** – Plainfield, NH  
Kimball Union Academy, Meriden, NH  
ZOOM

Anderson/Bradshaw  
Facilitator: N/A

### ***The Impact of an Inquiry Science Project on Data Analysis and Interpretation Skills***

Students in a high school anatomy and physiology course explored the concept of homeostasis through an inquiry science project to measure the impact on their data analysis and interpretation skills. Pre- and post-tests, pre- and post-skills surveys, interviews, and teacher observations were used to collect data. Both qualitative and quantitative analysis strategies were applied. Results indicated that inquiry-based learning supported stronger gains among less confident students and contributed to increased confidence in data interpretation

The following students earned a **Graduate Teaching Certificate** in one of these areas: Chemistry (CH); Climate Science (CS); Earth Science (ES) Elementary Science (EL); Life Science (LS); Physics (PS); STEM (ST):

Marcela Ines Blanco (ST); Andrea Clark (LS); Jackson Riley Dinsmore (LS); Rhiannon Fleming (PS); Sandra Gibson (LS); Celeste Kenworthy (ES); Weston Manor (ES); Bradley O'Connell (ES); Natalie Paula Taranec (LS); Michelle Zarowny (LS)

## 1999 Graduates

Paul Andersen, Bozeman, MT  
Edward Barry, Sacramento, CA  
Richard Dees, Billings, MT  
Maureen Driscoll, Butte, MT  
Janet Erickson, Helena, MT  
Beth Farrar, Rapid City, SD  
Kerry Friend, Cayucos, CA  
Jonathan Hanson, Bigfork, MT  
Melissa Henthorn, Turah, MT  
Kevin Klawonn, Lennox, SD  
Nancy Males, Mansfield, TX  
Wayne Mangold, Plevna, MT  
David McDonald, Sidney, MT  
Joy-Lyn McDonald, Sidney, MT  
Josey McLean, Great Falls, MT  
John Miller, Billings, MT  
Randall Morgan, Ketchikan, AK  
Kelly Morrow, Kalispell, MT  
Marjorie Robbins, Morton, IL  
Lisa Rubright, Manhattan, MT  
Peggy Taylor, Farmington, NM  
Shannon Walden, Fort Benton, MT  
Martin Wells, Taylor Mill, KY

## 2000 Graduates

Randall Carmel, Millersburg, OH  
Beverly DeVore, Meeker, CO  
Ivanell George, Houston, TX  
Jeffery Greenfield, Shepherd, MT  
Mark Halvorson, Sidney, MT  
Tom Hennard, Stavanger, Norway  
Steven Lockyer, Conrad, MT  
Ann Lukey, Alberta, Canada  
Lisa Mahony, Bozeman, MT  
Craig Messerman, Missoula, MT  
Kathleen Napp, Scottsdale, AZ  
Sandy Shutey, Butte, MT  
Lisa Snyder, Cheyenne, WY  
James Temple, Glendive, MT  
Melanie Vinion, Wooster, OH  
Chrystel Wells, Taylor Mill, KY

## 2001 Graduates

Robert Beese, Gardiner, MT  
Rodney Benson, East Helena, MT  
Jeffrey Berg, Auburn, MA  
Lawrence Bice, Cottonwood, AZ  
Penny Long Blue, Ellsworth, KS  
Kathy Brown, Taft, CA  
Daniel Campbell, Big Timber, MT  
John Etgen, Belgrade, MT  
Sharon Fox, Great Falls, MT  
Ashton Griffin, Goldsboro, NC  
Taylor Hansen, Bozeman, MT  
Deanna Hill, Alberta, Canada  
Richard Lahti, Fergus Falls, MN  
Sanford MacSparran, Logan, UT

Bradley Piroutek, Belleville, KS  
Rebecca Reno, Havre, MT  
David Robbins, Nairobi, Kenya  
Jack Schoonen, Dillon, MT  
Wendy Sink, Burton, MI  
Clinton Stephens, Escalante, UT  
Kathleen Thorsen, Menomonee, WI

## 2002 Graduates

Ronald Abarta, Chehalis, WA  
Shannon Bowen, Strasburg, VA  
Peter Bregand, Fullerton, CA  
Pamela Duncan, Woodstock, IL  
Leslie Griffen, Rohnert Park, CA  
Mary Jane Goebel, Rapid City, SD  
Jody Hurd, Helena, MT  
Tom Huston, Vale, OR  
Kevin Kapanka, Kenton, OH  
Lloyd Magnuson, Butte, MT  
Deanna Mazanek, Athena, OR  
Todd Morstein, Lakeside, MT  
Melissa Newman, Dutton, MT  
Chris Ottey, Bozeman, MT  
Robert Pendzick, Canfield, OH  
Mary Slack, Wheaton, IL  
Michelle Snyder, Athena, OR  
Michele Thomas, Bakersfield, CA  
Kerby Winters, Vale, OR

## 2003 Graduates

Cyndie Beale, Fairbanks, AK  
John Scott Beaver, Talpa, TX  
Amy Berg, Auburn, MA  
Eric Berg, Auburn, MA  
Nikki Bethune, Sapulpa, OK  
Bruce Bourne, Seeley Lake, MT  
Kevin Bowman, Jackson, OH  
Corbin Brace, Waterville, ME  
Kelly Cameron, Ridgefield, WA  
Ralph Carlson, Hilmar, CA  
Corinne Chavern, Pittsburgh, PA  
Susan Choman, E. Wenatchee, WA  
Tom Cabbage, Great Falls, MT  
Sandra DeYonge, Rye, NY  
Sharon Dotger, Raleigh, NC  
Phyllis French, Douglasville, GA  
Michele Geisler, Rutland, VT  
Michael Gregory, Pinedale, WY  
Robin Hehn, Roundup, MT  
Kathy Howe, Houston, TX  
Jack Julian, Cairnbrook, PA  
Linae Kendall, Saunemin, IL  
David Lee, Taylorville, NC  
Brita Lien, Alberton, MT  
Eric Matthews, Bozeman, MT  
Diane Mayer, Bozeman, MT  
Birgitta Meade, Decorah, IA  
Linda Moule, Claremont, CA

Susan Olsen, Brownsville, PA  
Ryan Prnka, Skagway, AK  
Rob Smith, Marengo, IL  
Sonja Steffan-Squires, Lancaster, CA  
Jim Striebel, Corvallis, MT  
Nicole Trombetta, Duluth, GA  
Melody VanderWeide, Grand Rapids, WI  
Jeffery Wehr, Inverness, MT  
Tim Ziegler, Stowe, VT

## 2004 Graduates

Kimberly Atkins, Annandale, MN  
Christopher Cox, Buffalo, WY  
Kelley Davis, Monkton, MD  
Kirsten DeHart, Houston, TX  
Patricia DiEduardo, Lewiston, ME  
Terry Edinger, Trabuco Canyon, CA  
Mary Margaret Eraci, Lombard, IL  
Randy Farchmin, Menomonee Falls, WI  
Dona Furrow, Jackson Center, OH  
Larry Gursky, Roy, WA  
Emmylou Harmon, Kremmling, CO  
Penny Juenemann, Two Harbors, MN  
Loren Kane, Natick, MA  
Robin Kent, Missoula, MT  
Dan Kloster, Longmont, CO  
Karen Krieger, Bozeman, MT  
Deanna Meyer, West Jordan, UT  
Lee Moss, Orangeville, UT  
Michael Mulligan, Brazil  
Katharine Murphy, Ogden, KS  
DeAnn Neal, Midvale, UT  
Jeannine Paszek, Reno NV  
Glenn Peterson, Greeley, CO  
Kim Popham, Lolo, MT  
Mary Porter, Melrose, MA  
Gordon Powell, Cortland, OH  
Chuck Shepard, Saltsburg, PA  
Bernie Smith, Colstrip, MT  
Dorothy Smith, Colstrip, MT  
Scotty Stalp, Germany  
Kim Walker, Johnson, KS  
Erika Wells, Jackson, WY  
Jeff Youker, Placerville, CA  
Brian Zeiszler, Elko, NV

## 2005 Graduates

Marc Affi, Seaside, CA  
Christine Bergholtz, Kenai, AK  
Matt Bilen, Elgin, IL  
Andy Broyles, Aberdeen, SD  
Brendan Casey, La Mesa, CA  
Peggy Collins, Dudley, MA  
Andrew Conger, New Orleans, LA  
Michelle Cullen, Valdez, AK  
Richard Davis, Frazier, MT  
Eric Dougherty, Newport, NC  
Brian Edlund, Benson, MN

**2005 Graduates - continued**
